Design smart.  
Build better.

# Navigating through a journey of global shift

The global momentum of rapid and powerful transformation is palpable. We are at a threshold defined by swift technological innovation and the limitless potential that comes with it. As these advancements guide us through unprecedented environmental challenges and escalating dangers of climate change, they signal a new era for humanity. A time where the essence of change seems to redefine itself every day.

## **MENA - A region on the rise**

In the midst of this global transformation, the region is at a pivotal point, striving for growth. We carry with us a vision that seeks to harness the art of innovation, a commitment to sustainability and addressing environmental change, a promise to economic growth, and the fostering of deeper community connections. A vision guided by enduring human values, transcending borders and focusing on the individual.

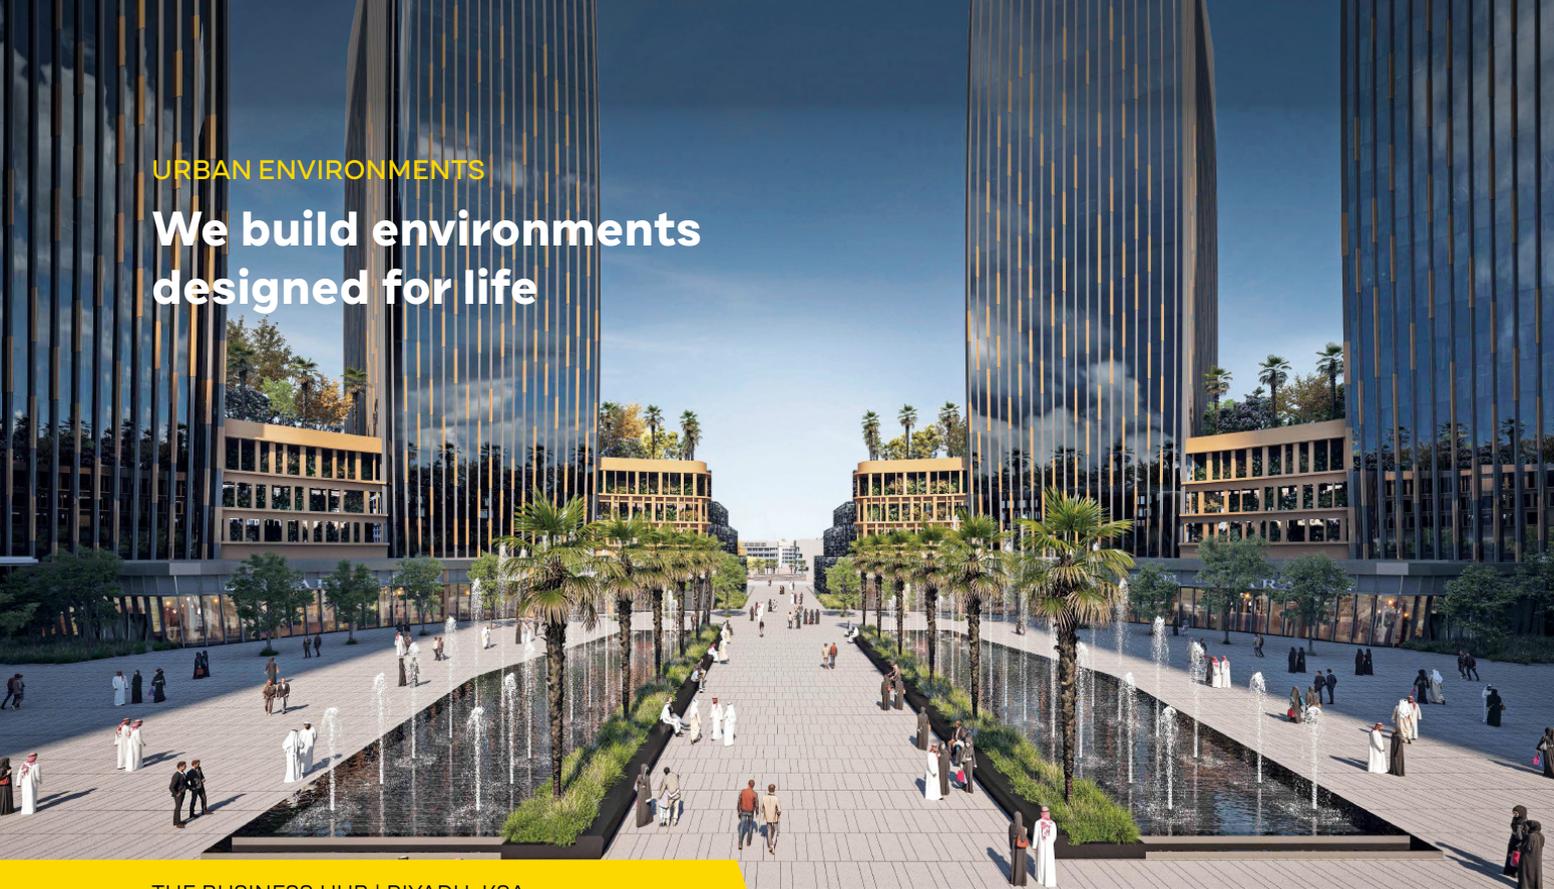

## **Your partners in building a world, better crafted for humanity**

At AJi, we stand assured, ready to be your partners in a world where change powers progress. The drive to embrace the future is rooted in our DNA and perfectly exemplified in our legacy and expertise. With a commitment to human-centric values, we aim to be catalysts in shaping a future guided by intellect, conceptual innovation, and emotional connections. Together, we can build a future that aligns with regional and global inspirations.

URBAN ENVIRONMENTS

We build environments designed for life

THE BUSINESS HUB | RIYADH, KSA

WELLNESS AND HEALTHCARE

We design spaces that heal

Our mission goes beyond building functional facilities; it centers on carefully crafting spaces designed to heal. Our design process is guided by empathy and a deep understanding of patient and staff needs. We're passionate about creating human centered spaces that transform simple solutions into meaningful concepts, built on the basis of sustainable thinking.

In partnership with HDP, a UK-registered entity based in the UAE, we have completed numerous projects, represented through a total capacity of over 16,000 beds within healthcare facilities in the Middle East. Each a reflection of our deep understanding of the unique requirements of biomedical, biotechnology, and pharmaceutical settings.

We bring passion into the research, planning, and execution of every project; carefully and thoughtfully crafting spaces, designed to heal.

We firmly believe in the power of communities and place them at the core of every thinking process. Delivering conscientiously designed environments that better impact lives is our driving mission, perfectly illustrated through many of the region's signature projects. Our integrative collaborations approach has allowed us to nurture a deep appreciation for cultural nuances, better understand urban needs, and embrace innovative thinking - reputing us as valued partners globally, and aiding us in crafting modern, sustainable, and community-tailored solutions.

Some of our international partners include:

NBBJ | P&T | Arup | WATG | Nadel Architects  
Leo A Daly | HDP | Niels Torp | DSA | HKS | CallisonRTKL

NUCLEAR MEDICINE CENTER | AMMAN, JORDAN

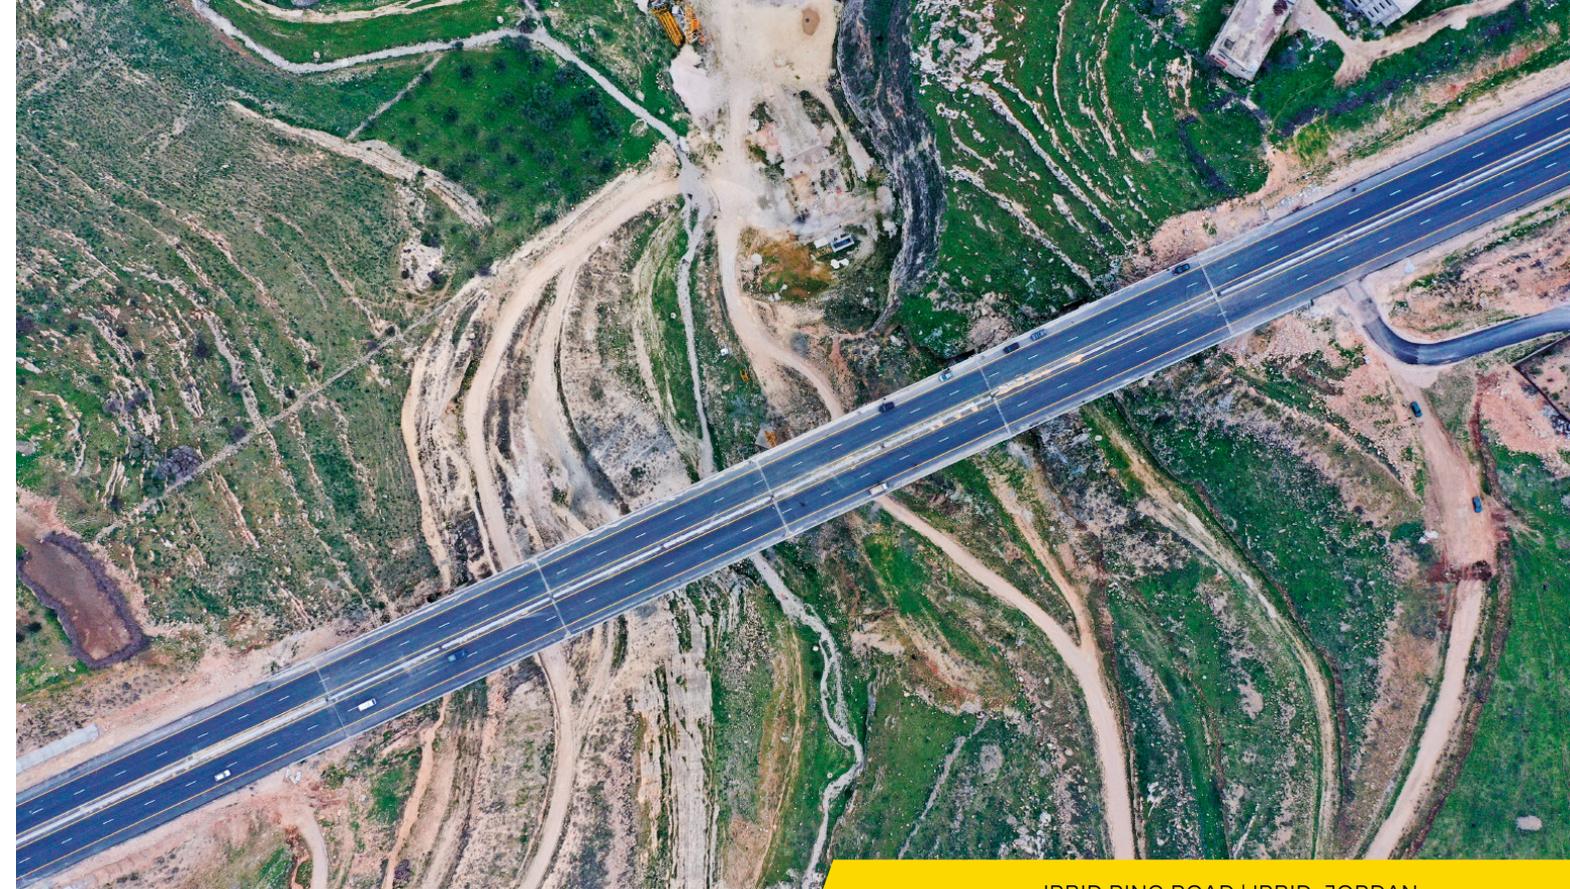

## UTILITIES AND ENVIRONMENT

### **We empower communities**

We believe that true progress and economic growth thrive within thoughtfully designed healthy environments. We aim to fully understand the unique needs of every community, while embracing the global necessity for sustainability. Whether collaborating with governments or private organizations, our objective remains clear: to help build resilient cities.

We deliver solutions that address water challenges and result in water loss reduction. We integrate waste management solutions and green infrastructure to empower communities in realizing their visions for the future. Through meticulous planning, design development, and utility management, our experts pave the way for better community futures.

IRBID RING ROAD | IRBID, JORDAN

## MOBILITY AND TRANSPORTATION

### **We connect people**

Our transportation planning solutions transcend mere functionality, and build vital channels of connection for the communities we serve. We meticulously evaluate specific challenges and needs, and design mobility solutions accordingly. Aligned with our Community Solutions teams, we extend our

reach to offer asset management services, ensuring effective life for both tangible and intangible assets. This approach reflects our dedication to community betterment, helping us in weaving urban networks that maximize community efficiency.

ECO-FUTURISM

## We nurture a greener tomorrow

GREEN RIYADH PROJECT | RIYADH, KSA

Our dedication to sustainability drives us to craft unique solutions that positively impact present and future communities. Guided by a deep sense of responsibility, we balance economic, environmental, and social considerations, aligning with international standards. We envision sustainable communities as places that cater for diverse needs, respect the environment, and enrich the lives of all residents. Hailing from the Middle East, a region with countries facing water scarcity, instills a heightened awareness in our central environmental team. This highlights our dedication to resource conservation, ecosystem protection, and cultural heritage preservation. Resonating with our core values, we aim to champion 'green' principles and innovative thinking throughout the region.

ADVISORY AND SOLUTIONS

## We mobilize progress

Our commitment to project success extends to encompass a spectrum of services tailored to foster strategic development and optimal project execution. With a multidisciplinary team of experts with top qualifications and hands-on experience, our services range from Program, Portfolio Management, and Project Management Office (PMO), Project Development Management, Project & Construction Management, to Advisory. We excel in comprehensive management services, offering our clients strategic planning, business case development, and advisory regulatory matters. We tailor our services to our client's

needs, aiming to improve project success rates and coordinate shared resources. At AJi, we leverage our professional expertise for pre-design, feasibility studies, design management and construction oversight, as well as operations and maintenance. Our versatile team works to support our clients through covering lenders' technical advisory, public sector reform, capacity building, and much more.

Our expertise, coupled with deep understanding and passion, are driving forces ensuring flawless project management and strategic development services for our clients across the globe.

EPMO & AFMO - RIYADH MUNICIPALITY | RIYADH, KSA

**At AJi, we are driven by truly lived values**

## **Innovation**

We grow by pushing boundaries, exploring new horizons, and harnessing cutting-edge technology to redefine what is possible. Our goal is to design solutions that are simply smarter, more sustainable, and always one step ahead.

## **Integrity**

We hold ourselves to the highest ethical standards, fostering relationships built on respect and transparency with our clients, partners, and colleagues. Trust is built through integrity, and it is a value we take pride in.

## **Integration**

We are a united force, pooling our network of expertise to tackle complex challenges. Beyond borders and boundaries, we are dedicated to ensuring our solutions meet the unique needs of every community we serve. Seamless network integration is not just a method for project success, but a commitment to communal harmony and lasting impact.

## **Inclusivity**

By connecting with leading global partners and drawing talent from across the world, we foster a culture that welcomes different perspectives and innovative ideas. By celebrating a culture of diversity and inclusivity, we enrich our work and the communities we serve.

# **We orchestrate constellations of global and local talent**

We believe in the power of transcending borders, adapting to the language of each community we serve, understanding its unique challenges, and tailoring bespoke solutions accordingly. We are curators of talent, leading a knowledge built platform onto which global talents join, delivering innovation in every project. Our integrative approach begins with a globally-inspired vision, connecting multidisciplinary local capabilities with top global ones. We form carefully tailored teams unified by shared values, creating a legacy of thoughtful engineers.

# Celebrating our milestones: AJi through the years

We never fail to celebrate pivotal moments that have shaped AJi's remarkable history and legacy. A proud past that has led us to where we stand today; headed towards an even brighter future.

## 2001 - 2010

AJi embarked on an era of exponential growth. From founding offices in Yemen, Iraq, Libya, Palestine, and the UAE under AJi Ltd., to building a team of over 550 employees, doubling the gross revenues, to a portfolio that featured projects from 20+ countries. In 2010 AJi was honorably ranked in the ENR as one of the top 225 design firms in the world.

## 2020 & beyond

After almost four decades of unwavering leadership, Bisher Jardaneh stepped down as CEO and retained executive chairman post. Hamzeh Awwad was named Group Chief Executive Officer in 2020, succeeding his 7+ years as an integral board member. Today, our commitment towards a future of growth, innovation and transformation continues, guided by our passion and honorable past.

## 1961 - 1980

Our founding companies 'MAR Jardaneh' and 'Arabtech' were established with a global perspective, fostering relationships with the MENA and beyond. Founded by merging engineering pioneer firms of Ibrahim Abu Ayyash and Talaat Kawalit's Arabtech, with Mohammed Jardaneh and Partners, we have grown to become rooted in the industrial, residential and educational sectors.

## 1981 - 1990

Formation of Arab Consult (now known as AJi Ltd.) as an owned international arm of Arabtech and MAR Jardaneh. AJi positioned itself as a leader in providing specialized services in the healthcare field, with the ownership of the UK-based specialized Healthcare Designers and Project Managers (HDP).

## 1991 - 2000

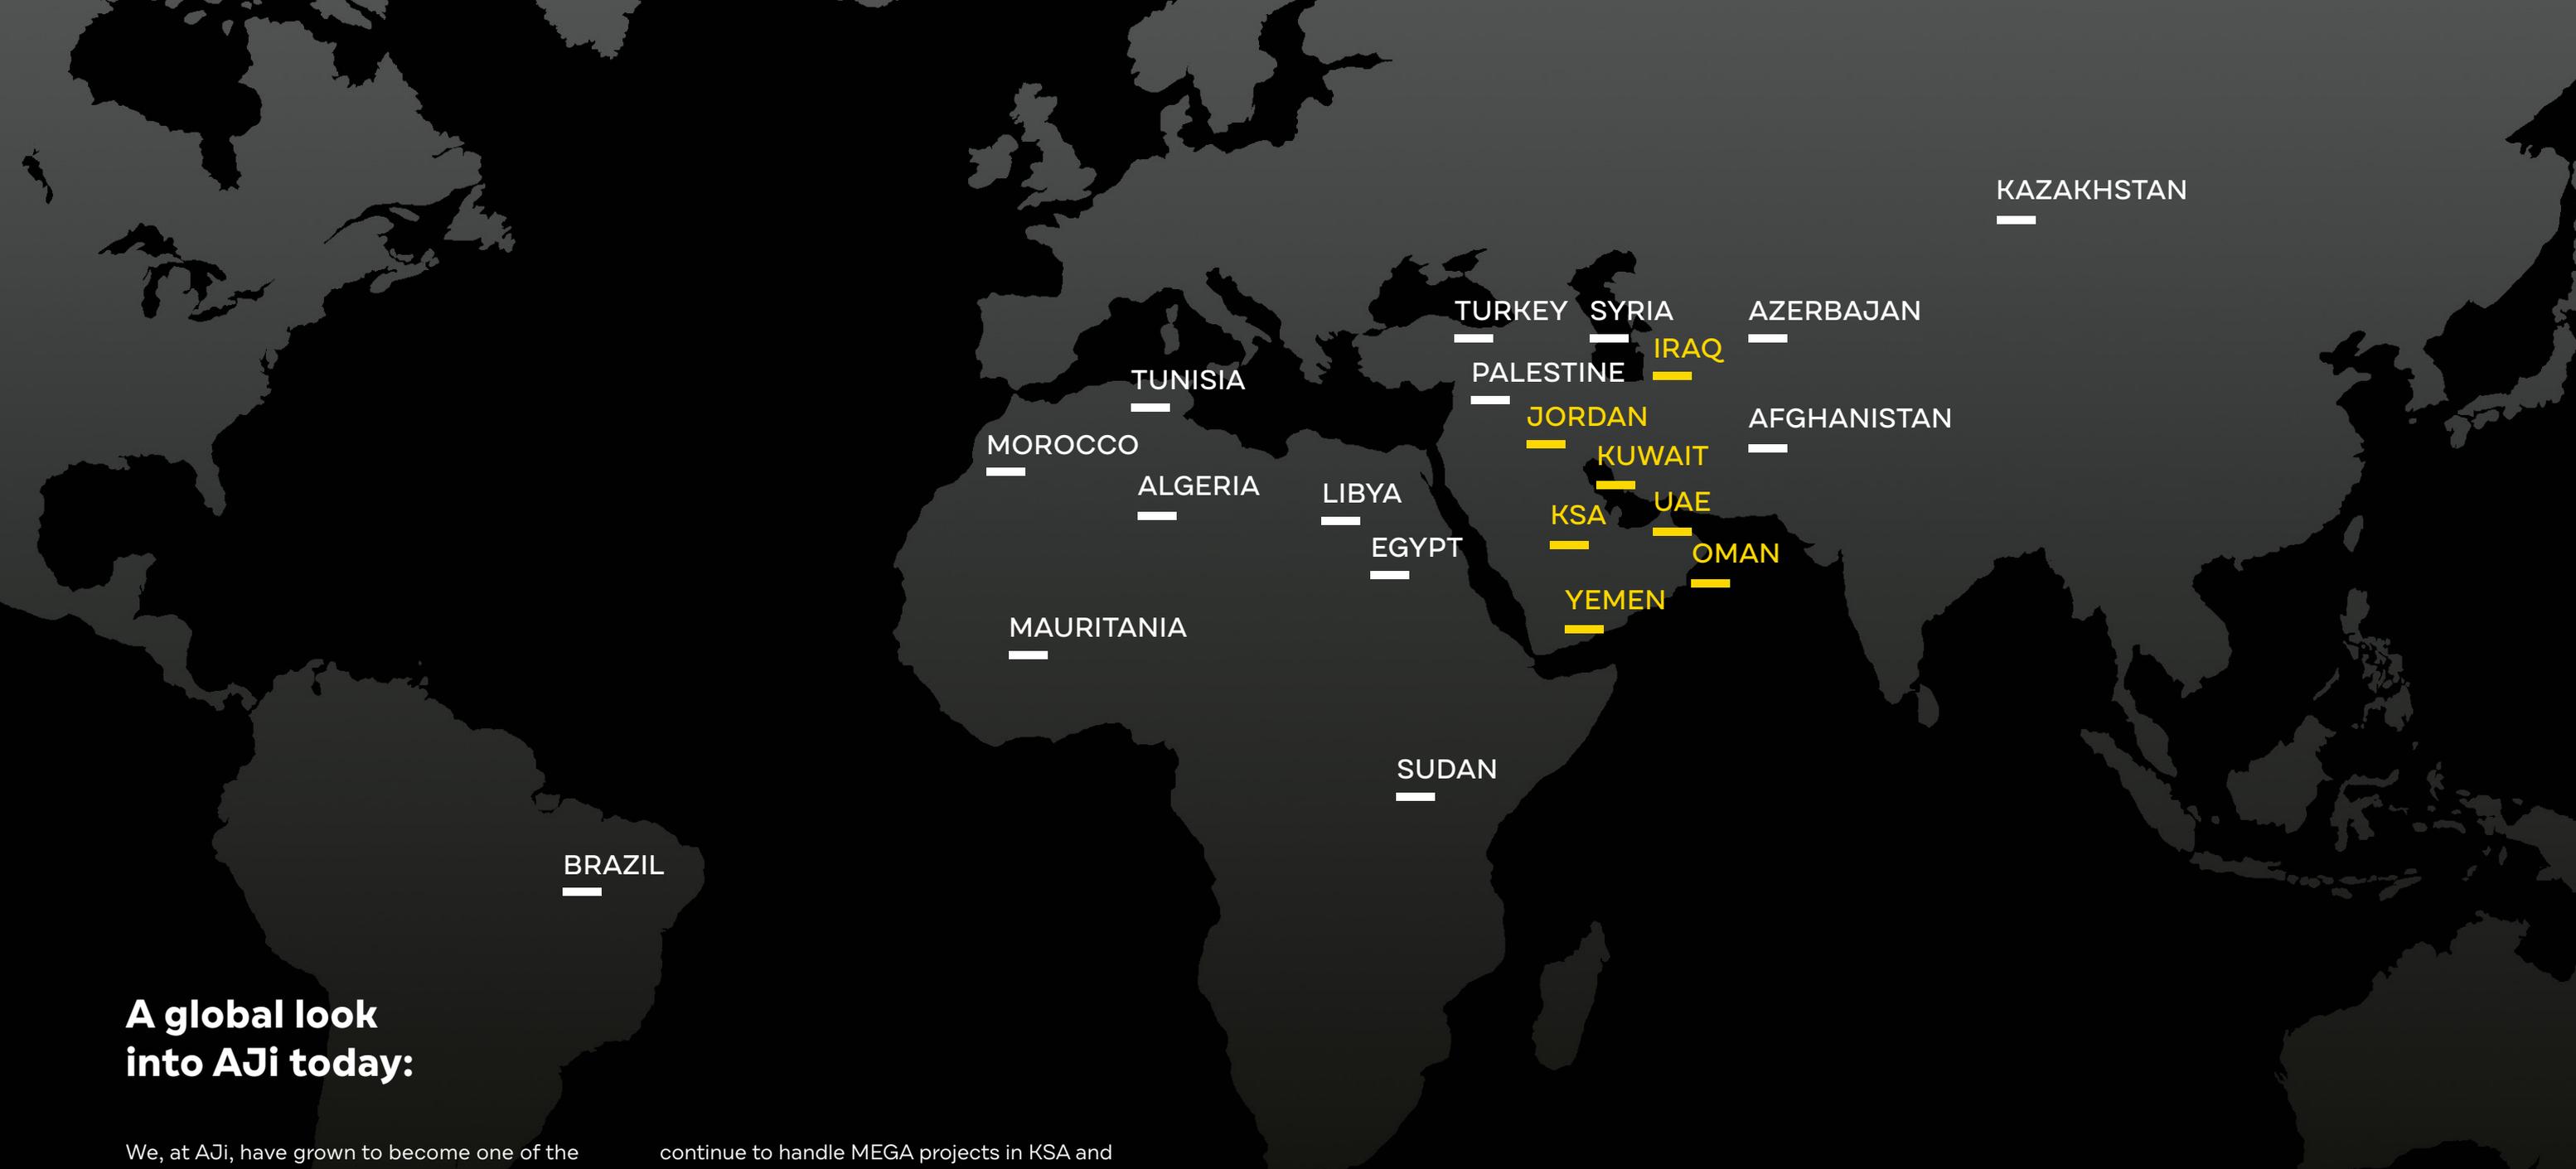

AJi was officially established as an early Middle Eastern merger. A joint equity with MWH (known as MWHAJ - Montgomery Watson Arabtech Jardaneh) was formed, specializing in water, wastewater and environmental sectors and projects. In 1989 Lyonnaise des Eaux Montgomery Watson - Arabtech Jardaneh (LEMA) was formed to manage water distribution projects in Amman, Jordan.

## 2010 - 2019

AJi successfully established itself in the Saudi market. The group was once again ranked in the ENR list of top design firms in the world, with higher rankings each year. During this time, AJi was also announced as one of the top 25 specialized consultants in the healthcare and educational sectors.

## A global look into AJi today:

We, at AJi, have grown to become one of the region's leading firms in architecture, engineering, and total infrastructure consultancy. With offices spanning across Jordan, the Kingdom of Saudi Arabia, the United Arab Emirates, Oman, Iraq, Kuwait and Yemen, we have left our mark on more than 20 countries.

Through recent years, we have been actively providing project management and PMO services, ranging from assets & facility management to development of technical standards and establishment of leadership training. We are contributors to the region's 2030 visions, and

continue to handle MEGA projects in KSA and UAE. Today, we diligently apply Environmental, Social and Governance requirements as part of all our business practices. From targeting zero carbon emissions, to our internal employee culture, we aim to continue growing our company's impact.

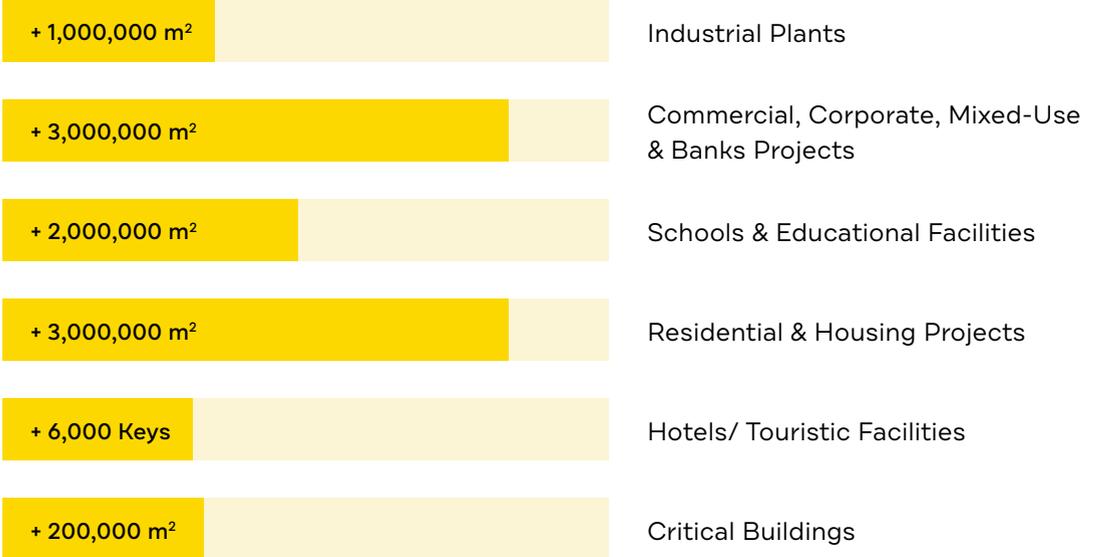

The fusion of 'glocal' principles lie at the heart of our approach; while our thinking is deeply rooted in understanding local cultures, our solutions remain of globally acclaimed standards. We believe in the power of digital transformation, constantly adapting to improve the way we design, build, and manage.

# Our ENR Top 225 International Design Firms history

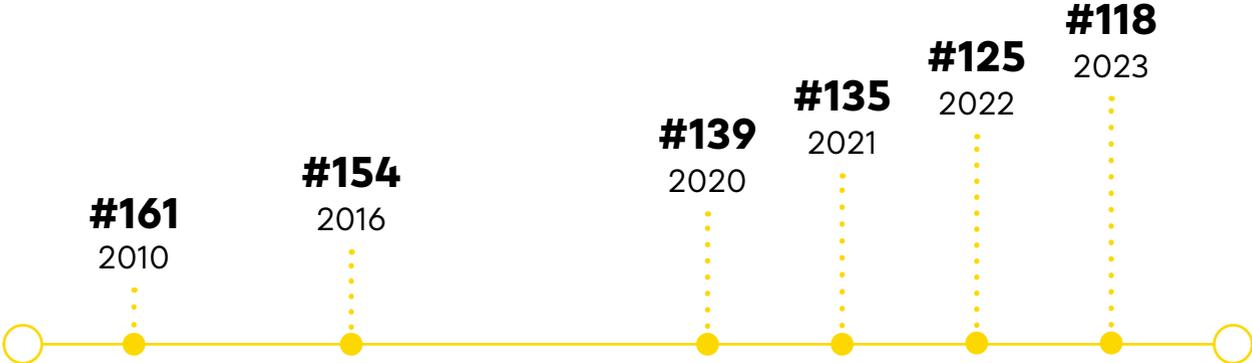

We are honored to be acknowledged as reputable partners and engineering consultants in the MENA region. A reputation upheld by consistently securing a place among the top 225 international design firms by ENR (Engineering News-Record) over the past decade.

In the healthcare sector, our design and engineering services have earned us recognition among the top 25 international consultancies in 2016, 2019, 2020, and 2023, according to ENR. An accomplishment exemplified in the total capacity of over 16,000 beds within our healthcare projects throughout the Middle East.

Having worked on over 2,000,000 square meters of educational facilities, encompassing schools, colleges, and universities, our contributions to the educational sector have been acknowledged with a top 25 ranking in 2019, 2021, 2022, and 2023.

In 2022, we secured a place among the top 25 in Wastewater Treatment, as well as the top 50 in Sewer and Solid Waste.

These honored achievements are a testament to our unwavering commitment to serving our clients, communities, and extending our global reach.

# The people behind AJi

At AJi, our team embodies the spirit of youth and dynamic energy. Our thoughtful and wise leadership provides a steady compass for our growth. We thrive in a culture that is resilient, smart, conscientious, innovative, and flexible; always embracing new challenges with optimism and drive. We believe in the potential of our people, fostering trust, loyalty, and a strong sense of responsibility. We, at AJi, are driven by the belief that greatness is only achieved through collective efforts.

## Meet our Board of Directors

**Bisher Jardaneh**  
Executive Chairman  
& Board Member

Eng. Jardaneh has dedicated four decades to the company. He assumed the position of Chairman in 2014 and continued to serve as both Chairman and Executive Managing Director until September 2020, when he became Executive Chairman. Jardaneh holds degrees in Civil Engineering and Construction Management and is a member of several professional and business associations, including the Young Presidents Organization.
